

Neutralising Fluids

CGT-N5 HyPerformance neutralising fluid

CGT-N5 is a new formula developed for brushed stainless steel surfaces that successfully neutralizes and removes acid and prevents the (re)appearance of white marks on the surface after weld cleaning, polishing or marking process.

Benefits of the CGT-N5 Fluid

- N-5 is a non flammable degreaser suitable for Pre-cleaning Weld Joints.
- Eliminates need for water during the electrochemical cleaning process.
- Neutralises all other phosphoric cleaning fluids on the market.
- Residual neutraliser dissipates without streaking.
- Suitable For cleaning and degreasing All stainless steel surfaces.
- Industrial strength .
- Bio Friendly.
- Reduces Labor when Neutralising electrolytic acids.

CGT-N5 HyPerformance Neutralising Fluid. Neutralisation is crucial to stop the acid's impact after the electro-chemical and electro-polishing processes. Incomplete neutralisation allows the acid to continue interacting with stainless steel surfaces. For effective neutralisation, treat surfaces with CGT-N5.

Part nr.	Item
WELC3165	CGT-N5 HyPerformance Neutralising Fluid - 500ml
WELC3158	CGT-N5 HyPerformance Neutralising Fluid - 5L

Often bought together:

Part nr.	Item
WELC2201	Spray bottle with sprayer 0.5L (empty)
WELC2092	Sprayer for spray bottle - orange
WELC2867	Cougartron acid resistant gloves - 1 pair
WELC2868	Cougartron safety glasses

“CGT-N5 is a game-changer in our electro-chemical and electro-polishing processes. Its mineral acid base ensures effective neutralization, crucial for safeguarding stainless steel surfaces, we recommend.”
