

# Silicone Purge Plugs

Purge 'N'Weld Purge plugs offer the perfect solution for all your high-purity back purging applications. Constructed from heat-resistant silicone, these plugs can be used in close proximity to the Heat Affected Zone (HAZ).

They enable you to use less Argon, drastically increase your purge process speed, and achieve a higher return on investment by optimizing direct labor and overhead recovery costs.

The kit contains 6 pairs of plugs, gas diffuser, purging tube and quick release fitting for instant purge line connection.

## Set buying information

Part nr.	Description	Weight
CP3000	Purge 'N'Weld - Silicone Purge Plugs Set - 23-103mm	2,5 kg

## Set contents

Part nr.	Description
CP2002	Purge Plugs - 23-27mm
CP2004	Purge Plugs- 31-39mm
CP2005	Purge Plugs - 45-53mm
CP2006	Purge Plugs - 54-64mm
CP2007	Purge Plugs - 73-76mm
CP2008	Purge Plugs - 83-103mm
CP2009	Gas diffuser for silicone bung system
CP2019	PVC hose - 2m
CP2020	Hose clip for silicone bung system
CP2021	6mm Tube Connector

"Purge Plugs from Cougartron have transformed our high purity welding. Their high heat silicone construction allows for close proximity to the heat affected zone, reducing Argon usage and purge times. Thanks Partner!"

### Key features:

- Purge 'N'Weld Plugs create a flawless seal, ensuring a clean welding environment.
- Maintaining a pristine environment results in stronger, reliable welds.
- High-quality sealing streamlines the cleaning process, saving time.
- Premium silicone construction withstands high temperatures for durability.
- Each set includes a diffuser for consistent, high-quality welds.
- Six pairs of bungs cater to various pipe diameters, suitable for diverse welding projects.
- Includes bungs, diffusers, quick-release coupler, and purging tube for a successful welding experience.
- Packaged in a durable Cougartron orange case for easy portability and organized storage.
