

# Cougartron Plus DATA SHEET

## GENERAL DESCRIPTION:

Cougartron Plus is a smart solution for smaller production environments. This effective electrochemical weld cleaner provides excellent results on smaller (1-5mm) stainless steel TIG welds and is equally useful for both off- and on- site use.

Cougartron Plus is a fantastic machine for one-step cleaning, passivation, electro-polishing and marking on stainless steel welds and surfaces. The electrolytic method provides the best corrosion resistance and it is safer, more environmentally friendly and quicker than pickling paste or mechanical grinding.

With the addition of [Cougartron Basic Etching Set](#), Plus can also be used for marking and etching.
